learningpool

Centralised content management made simple

Control. Update. Deliver – All in one place

40% more affordable

Seamless integration

Designed for L&D and Compliance

With Learning Pool's LCMS, you can:

Simplify the management of large content libraries

Protect high-value learning materials with controlled access

Improve the experience for both learners and administrators

So you can focus on delivering impactful learning, not managing complexity.

Who needs an LCMS?

"We manage and update large volumes of content across multiple platforms." Eliminate the administrative burden of manual updates.

"We need to protect our high-value content when sharing it." Control who can access content and for how long with instant revocation.
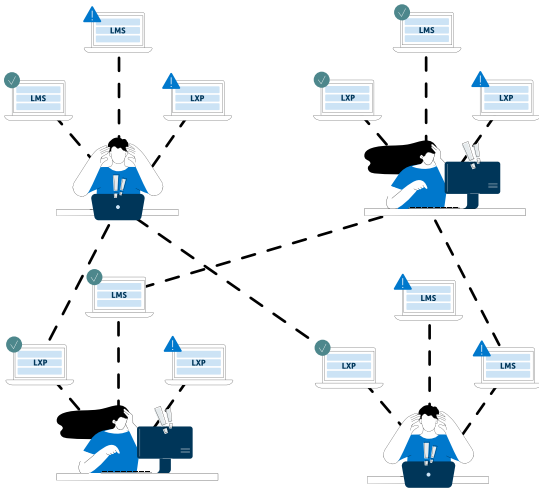

"We lack an efficient way to track completions across platforms." Get centralised reporting and insights into content usage.

"Our customers need content in multiple formats." Supports SCORM, xAPI, PDFs, audio, and video, ensuring seamless distribution.

The problem we solve

BEFORE: Content widely dispersed across learning platforms

- No single source of truth
- No access control
- Version control headaches
- No centralised reporting

AFTER: Content centralised for easy distribution

- One master content library
- Granular access control
- Streamlined version control
- All completion data in one place

How it works

1. **Upload** content from any authoring tool to the LCMS.
2. **Generate launch files** in SCORM/xAPI format.
3. **Upload launch files** to your learning platform.
4. **Manage access & licensing (optional)** for control over who can see the content.
5. **Update once**, and all platforms using the launch file will automatically display the latest version.

Why Learning Pool's LCMS?

- **40% more affordable** than alternatives in the market.*
- **Seamless integration** with any learning platform, no vendor lock-in.
- **Designed for L&D and Compliance** - the only "right-sized" LCMS built for this industry.

Special pricing: Exclusive discounts when used with Learning Pool's learning platform.
